To Whom It May Concern,

I am pleased to recommend Kevin S. Bao as a strong candidate for any opportunities that align with his talents and aspirations. Moog is a global leader in motion control across land, sea, air and space (www.moog.com). During his tenure as an intern at Moog this summer, Kevin worked for Production, Supply & Chain, Engineering and Quality departments in rotation, and he consistently demonstrated qualities that demonstrate that he is a valuable team member and will have a promising future in his field.

Kevin exemplifies confidence, self-motivation, and enthusiasm. He approaches challenges with determination and a positive and humble attitude. He proactively engages in discussions and seeks feedback to enhance his understanding and contributions. This eagerness to learn and grow has made him stand out in our organization.

Regarding people skills, Kevin fosters relationships grounded in respect, credibility, and effective communication. He skillfully balances assertiveness with openness, which has allowed him to collaborate effectively with his peers and supervisors. Kevin can quickly adapt to foreign environments as he can fit in seamlessly in a professional setting. Despite the partial language barrier that was present, he was able to communicate proficiently with others. One such instance is when he attended a company dinner consisting of all the executives. He was able to acquaint himself with all attendees and hold insightful conversations with those present.

Kevin also possesses impressive technical fluency and conceptual skills. He has demonstrated a strong ability to synthesize information and apply it effectively. Furthermore, his organizational skills are commendable, as he consistently meets deadlines and accurately manages tasks. These attributes enable him to deliver high-quality outcomes, even under tight timelines. Kevin has shown remarkable progress. He actively applies feedback to improve his performance and embraces new challenges with enthusiasm and a growing sense of independence.

While his current strengths are evident, he has opportunities to further enhance his communication, critical thinking, and research skills. I believe that targeted training and cross-departmental collaboration would benefit his development and increase his value to any organization. Therefore, during his stay at Moog, he was assigned to work at each of the 4 different departments as mentioned earlier at different points of his internship.

Looking ahead, I anticipate Kevin will thrive in roles that allow him to apply his technical expertise, collaborate with teams, and take on greater responsibilities. His ability to learn

No. 116 North Banjing Road Taicang, Jiangsu Province China | Tel: +86-512-5350 3600 | Fax: +86-512-5398 0038 | Web: www.moog.com.cn

quickly, coupled with his dedication and adaptability, suggests that he will excel in more advanced assignments and make significant contributions. Since he is currently a sophomore, I also expect him to expand further upon his technical background as he continues schooling in industrial engineering at Purdue.

In summary, I am confident that Kevin has the skills, determination, and potential to excel in any endeavor he undertakes. He has been an invaluable asset to our organization, and I look forward to seeing his continued growth and success. Please feel free to contact me at byuan@moog.cn or the phone number in the above if you have any questions or require additional information.
